- Docker
- Kubectl
- Terraform
- Git
- GitLab CI/CD

Monitoring

- OpenTelemetry
- AWS CloudWatch
- Zipkin

Summary

A compassionate software engineer who is seeking their next role where they can make an impact. I bring over a decade of leadership experience across a range of industries and a year of software engineering experience.

Experience

Full Stack Software Engineer, Team Lead February 2022 – Present
Fobi AI

Provide a good work environment for the team. Help balance the competing priorities of various stakeholders, provide mentorship to teammates and lead discussions regarding both company culture and technical topics.

Full Stack Software Engineer February 2022 – May 2021
Fobi AI

Working in an agile team, developing our analytics platform to support custom use cases, improve reliability, reduce costs and add new features.

Building Designer June 2020 – November 2016
JCR Design & Drafting

Core responsibilities include mentorship for new designers, reviewing drawings before submissions, coordination between involved parties and designing buildings. In this role, I set up and did system administration for our IT systems and scripted away repetitive parts of the job.

Projects

This resume you are looking at  April 2021
[Updated PDF](#) 

Using React as a template engine, this resume shows how web technologies can be used outside a browser context. I have applied a similar concept for dynamically creating emails with MJML and React in a production application.
Made with: React, Playwright, and Typescript

Education

Web Development Diploma 2021
Lighthouse Labs

Learned practical skills to use web technologies to build modern websites, apps, & tools.

Architectural Drafting Certificate 2015 – 2016
University of the Fraser Valley

Developed skills to design buildings, write technical documents & navigate the legal frameworks regulating the building industry.

Computer & information Systems Studies 2014 – 2015
University of the Fraser Valley

Developed foundational skills to integrate information technologies into a business.
